SECURITY AGAINST BALLISTIC THREATS

Despite the best designed security procedures, the threat of weapons remain a constant within government facilities. The security risk of harm caused by bullets from a rifle or handgun can be managed by integrating ballistic-resistant panels within defensive architecture.

ArmorCore® bullet-resistant fiberglass panels are the safest, most affordable, and efficient ballistic protection solution available for both new construction and remodeling projects.

From Federal courthouses to county jails and local school board chambers, **ArmorCore**® panels, concealed behind drywall or woodwork of walls, counters and doors, provide superior security from firearms.

Unique benefits of **ArmorCore**® panels include:

- UL Listed at all 8 levels of the UL 752 Standard
- Easy to Install with Conventional Tools
- Effective Delay Against Forced Entry
- Low Wicking – preventing build-up of mold
- Non-Toxic Materials – no Formaldehyde
- Available in Panel Sizes up to 5' x 10'

APPLICATION SITES

ArmorCore® bullet-resistant panels are an ideal Defensive Architecture solution for:

- Courthouses / Court Rooms
- Public Safety Facilities
- Educational Facilities
- Embassies & Consulates
- Justice Buildings
- Utilities
- Veteran's Administration Facilities
- Homeland Security Facilities
- Federal/State/County Offices
- Council Meeting Rooms

Build For Life

Combining woven-roving fiberglass with resin, **ArmorCore®** panels capture the ballistic projectiles in a process called ply-delamination without ricochet or spalling.

ArmorCore® panels deliver superior security against bullets and blast fragments.

Through a proprietary manufacturing process, **ArmorCore®** panels are precision-assembled and cured in a press with heat and pressure, maintaining quality and consistency.
